Orgnization Briefing	<p>Easy Carbon Consultancy Co. Ltd. (Easy Carbon) is an independent consultancy located in Beijing, P. R. China. As one of the first local consulting companies on the CDM, Easy Carbon is leveraging its experience to assist partners in optimizing opportunities and overcoming risks associated with securing and developing CDM projects in China, so that carbon finance can be realized. Easy Carbon provides turn-key consultation services related to each link of the CDM procedures for the local industries. Meanwhile, Easy Carbon also mobilizes other financing opportunities for the projects in renewable energy sector.</p> <p>In the field of CDM project development, Easy Carbon has achieved outstanding progress. With real practice on projects, a CDM project development system has been set up and a series of mature templates of documentation and procedures related to the core technology of methodology, CER calculation, project emissions and leakage disposal and monitor plan are ready, which can be used as a reference and solid base of CDM projects in the future.</p> <p>With the possession of core techniques of CDM project development, Easy Carbon is also carrying out commercial development for the project in carbon market utilizing rich experiences and broad connections in the field to realize a maximum carbon value of the project, and assist project owners in achieving the maximum profits. Through previous project development and experience of communicating with buyers, smooth cooperation and mutual trust has been established with the main buyers of carbon credits, who have full confidence on the technical strength and reputation of Easy Carbon. Therefore, buyers trust the projects developed by Easy Carbon, and Easy Carbon is able to gain from the buyer the most favorable contract terms including price, terms and conditions. In 2006, one of the wind power projects Easy Carbon has undertaken achieved an outstanding CER price (fixed price - above 10 €/ CER) and obtained the contract terms that are with low risk and balanced conditions. For the moment, this project has been registered successfully with the EB. The CER price is still the highest among all the CDM projects approved by Chinese DNA (by March 2007).</p> <p>From October to December 2006, Easy Carbon has won several biddings in the open tender for CDM project development for leading power producers such as China Guodian Corporation and China Huadian Corporation. Until now, four of the five biggest power producers in China have become our clients. Furthermore, Easy Carbon has established the long-term cooperation relationship with many large well-known enterprises. Equipped with solid technical strength and professional services, Easy Carbon enjoys high reputation in the field of CDM</p>	

project development in China.

The objective of Easy Carbon is to provide the project owners with the best services and realize the carbon value of the projects to the maximum through cooperation, and help China obtain more profits from the CDM market. Easy Carbon believes that carbon value of projects can be maximized through close collaboration with project owners, responsible and diligent work on the CDM technical development, thorough development of carbon transaction strategy and active involvement in the CDM market.

Easy Carbon – Your partner in achieving innovative carbon value of the projects!
